

RE-START BATTERIES

Since 2010 Antigravity Batteries has been a leader/innovator in Lithium-Ion Motorsport Batteries and related products. Antigravity Batteries offer a 70% weight reduction over lead/acid batteries while providing up to 2X the cranking power! By switching to an Antigravity you can drop up to 10 of weight resulting in better handling, shorter braking distances, better acceleration and less sprung weight, not to mention better starting.

RE-START
Never get stranded again.

The RE-START is the first and only battery with Built-In Jump Starting! Never worry about leaving your lights on and coming back to a dead battery. Simply press the RE-START button to activate the built-in jump starting, start the bike and ride away.

- Lightweight Lithium Ion Battery with built in jump start
- Perfect for everyday or race use
- Available in OEM Powersports Standard Sizes

XPS EXTREME POWER BATTERIES

XPS EXTREME POWER

The "Extreme Power" models offer the most power possible for cranking, but in the smallest package possible

- Designed for Race Applications or Custom Motorcycles
- The most Cranking Power in the most compact size
- Starts High Performance vehicles with dramatically reduced weight
- 180 to 780 Cranking Amps
- Not Recommended for regular street use

MFR#	VL#	Case Type	CA	Dimensions	Weight	Notes	Retail

SMALL CASE BATTERIES

SMALL CASE

The "Small Case" models are the smallest and lightest format from any manufacturer.

- Greatest ability to save space and weight
- 120 to 480 Cranking Amps
- Capable of starting large V-Twins and hi-horsepower race motors
- 1.25" to 3.25" thick
- 13 Ounces up to 3.25 Pounds
