

DEALER SUPPORT

Business-to-Business Website:

For up to the minute information visit our website at www.VLEonline.com. The new business-to-business website will allow you to view inventory in real time and **place your orders online!** Each SKU is assigned an image to help reduce any confusion in orders, so what you see is what you get. You can also e-mail us through the Contact page on our web site to get prompt replies to any question you may have. Contact your sales rep about creating your interactive account!

Daily Inventory Feed - FTP Site:

Customers needing a complete daily inventory feed can access our FTP site. The daily inventory file is updated every night at 5 p.m. PST and contains product ETA's as well as the most current inventory available. For the convenience of our customers, we have provided the file in both Excel spreadsheet and Tab Delimited formats. Contact your Van Leeuwen sales rep for log-on and password information.

CD ROM:

Van Leeuwen Catalog #39 is also available on CD ROM!

The entire catalog has been saved in a PDF format that can be accessed quickly from your CD drive, or saved to your hard drive for instant access. This full-color digital catalog opens with Acrobat Reader (included on disc) and is a snap to navigate. A must have for every sales counter! Works on PC or Mac.

Hi-Res Images:

High resolution images are available to help you with the production of catalogs, ads or website development. Van Leeuwen will supply images on a product line basis, on CD or via E-mail. All images are cataloged in folders by sections and can be saved as EPS, JPG or just about any format you need.

Price Books:

Van Leeuwen Price Books are available for many popular dealer management systems through the vendors below. Simply call your software provider and request the latest Van Leeuwen Price Book. Updates are done quarterly. If your system isn't listed here, we may still be able to help. We can provide price files in ASCII text or Excel formats, or work directly with your software vendor.
